

Description

Kombi Rinse is a concentrated rinse additive formulated for use in the final rinse cycle of combination steam ovens. Used after alkaline cleaning, it helps neutralise residual alkalinity while promoting faster drying and reducing water spotting for a clean, streak-free finish. Suitable for use in both soft and hard water conditions, Kombi Rinse is designed for automatic dosing systems in commercial kitchens, bakeries and food processing facilities. It helps maintain the appearance of equipment and supports efficient operation by improving the final rinse and drying process.

KOMBI RINSE

Automatic Rinse Aid for Combination Steam Ovens

Features & Benefits

- Accelerates drying
- Eliminates Spotting
- Neutralises alkaline residues
- Effective in both soft and hard water

For Use On

Use in the final rinse of combination steam ovens
